Quality and the Environment

Wood material for SAWO sauna rooms and accessories comes from sustainable forests and environment-certified suppliers in Canada, Europe and Finland. SAWO products are produced with minimal waste as all the leftover materials are either reused or recycled. SAWO is highly emphasizing conservation of natural resources and constantly striving for being the most sustainable sauna manufacturer on the market.

Glass Front Sauna Rooms

Nordic landscapes are one of the most marvelous masterpieces of nature. They are beautiful and unique that cannot be found anywhere else in the world.

Glass Front sauna rooms are inspired by these lovely landscapes. Thus, these sauna rooms are with fervent clear tempered glasses on the front that bathers may enjoy a delightful view of the outside. The benches are attached with stainless leg support. Benches, heater location and door opening can be reversed to either left or right, a feature that gives possibility to install the sauna room on a more favorable position.

Glass Front sauna rooms are best paired with luxurious heater and sauna accessories. You may play around with lights of your preference to have a cozy interior ambient. A 100 watts of power is allocated for the lights when using Innova controls.
