VENTURI PIPE

SAWO Venturi Pipe vacuums air inside the pipe where hot and fresh air combines and pushes steam into the steam room. This process creates mild and soft steam and prevents hissing noise from the pipe.

SAWO Venturi Pipe has two designs with similar performance: L-Shape and Straight.

- » Generate a milder and softer steam
- » Create more clouds of steam
- » Prevents hissing noise
- » Made from Stainless Steel

Venturi Pipe Straight

Code: ST-PIPE
Size: 570 x 102mm

Venturi Pipe L-shape

Code: ST-L-PIPE
Size: 563 x 207mm
