## Minidragon

A small sauna is like the jewel of your residence and the heater should be equally precious! I wanted to create a magnificent piece of conversation that simultaneously provides you with great steam, warmth and heat. We applied my "Junglefire" pattern into the red colored velvet surface for both our "Minidragon" and "Scandifire" heaters. And no matter what the level of fire, safety above all: These red hot jewels won't burn your ass!
